

## Enhanced Surgical Skills Training Teaching Kit: Pre-Session Activity

Do you believe a post-residency training program in a rural area can train residency graduates in procedural skills? If yes, which ones?

How far from your medical school or local hospital is it to the nearest provider for the above procedures? If you work in an urban community, please pick a nearby rural community or your home community.

Check the boxes if the providers in your county and surrounding counties do the following (for each procedure, specify if F.P, Gen. Surgeon, OB, etc. and any details about their training you are aware of such as fellowship or not).

	No Providers	F. P.	General Surgeon	O.B.	Other (please specify)
C-Sections					
Endoscopy-upper					
Endoscopy-lower					
Tubal Ligations					
D&C					
Vasectomy					
Ultrasound					
Hernias					
Appendectomy					
Ectopic Tubal
